RIYA SHARMA

Bengaluru, Karnataka · riya.sharma.test@example.com · +91 90000 12345 · github.com/riya-sharma-demo

PROFILE

Entry-level software developer with academic project experience in Python, SQL, and Git. Interested in backend development, data handling, and building reliable applications. This synthetic profile is provided for ClearHire workflow testing.

TECHNICAL SKILLS

Programming: Python, SQL, basic Java
Databases: PostgreSQL, SQLite
Tools: Git, GitHub, VS Code, Linux
Concepts: REST APIs, data structures, relational database design

PROJECT EXPERIENCE

Student Expense Tracker · Python, PostgreSQL, Git · Jan 2026 – Mar 2026
• Built a command-line expense tracker in Python with create, update, delete, and monthly-summary features.
• Designed PostgreSQL tables for users, transactions, and categories; wrote SQL queries using joins, grouping, and aggregate functions.
• Used Git branches and commits to track changes and maintained a GitHub repository for the project.

Library Inventory API · Python, SQLite, Git · Aug 2025 – Oct 2025
• Created a small REST API in Python to manage books, borrowers, and issue records.
• Used SQL statements to search records, enforce relationships, and generate inventory summaries.
• Added input validation and documented setup steps in the project README.

EDUCATION

Bachelor of Technology — Computer Science
Example Institute of Technology, Bengaluru · 2025–2029
Relevant coursework: Programming Fundamentals, Database Management Systems, Data Structures

ADDITIONAL INFORMATION

Availability: Internship / entry-level opportunities
Languages: English, Hindi
